Maro ny loza mitranga isan-taona maneran-tany mandritra ny fanoloana kodiarana. Noho izany dia ilaina ny manaraka fepetra fiarovana mba hisorohana izany karazana loza izany.

Inona no tokony hatao raha vaky ny kodiaranao eny an-dalana?

. Alefaso avy hatrany ny jiro famantarana loza.

. Hoento moramora mankany amin'ny toerana azo antoka ny fiara. Aza manao fijanonana izay mety hampidi-doza ho an'ny fifamoivoizana.

Inona havy ireo fitaovana tokony ho ao anaty fiaranao ?

Alohan'ny hiaingana, dia ilaina ny manana ireto fitaovana manaraka ireto:

- Akanjo mitsy taratra (veste réfléchissante), triangles famantarana mialoha 3, cones, kodiarana fanoloana amin'ny toe-javatra tsara, kit fanampiana voalohany, extincteur, ary fahazavana (torche).

Inona avy ireo fepetra fiarovana tokony harahina?

Raha vao mijanona ny fiara:
